

The University of California, Irvine

proudly presents:

2004 NOBEL PRIZE WINNER

FRANK WILCZEK

June 12, 2006

8:00 p.m.

Irvine Barclay Theatre in Irvine

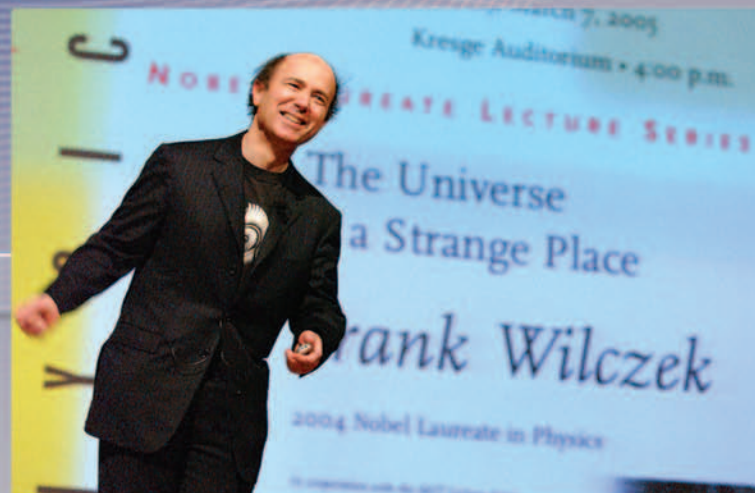

Admission is Free

Advance Registration is encouraged!

Please register at: <http://susy06.physics.uci.edu/nobel>

“The Universe is a Strange Place”

MIT Physics Professor Frank Wilczek, one of the world's most eminent theoretical physicists, will talk about the strange and beautiful subatomic world whose building blocks physicists have come to understand as notes in a “Music of the Void.” He brings this world, with its deepening mysteries and challenges, to life with jokes, pictures, and facts. Frank will also talk about the biggest mystery in physics - Dark Energy, which seems to be accelerating the expansion of our universe.

Frank shared the Nobel Prize in 2004, for the discovery of asymptotic freedom - work he did when he was only 21 years old, as a graduate student at Princeton.

Frank is well known for his ability to communicate successfully with a wide range of audiences. He has written a beautiful book, “*Longing for the Harmonies*,” with his wife Betsy Devine. His new book is titled “*Fantastic Realities: 49 Mind Journeys and a Trip to Stockholm*.”
